PRATIK KATHE

Senior Product Designer | B2B SaaS | Design Systems | Accessibility (WCAG 2.2)

Mumbai, Maharashtra, India | +91 8411832697 | kathepratik29@gmail.com

LinkedIn: linkedin.com/in/pratik-kathe | Portfolio: pratik-kathe.github.io/portfolio

PROFESSIONAL SUMMARY

Senior Product Designer with 4.5+ years of experience designing complex B2B SaaS, enterprise web and mobile products. Experienced in end-to-end product design, accessibility-first design systems, complex workflows and cross-functional Product/Engineering collaboration. Sole designer of BarrierBreak's accessibility SaaS suite, now used by 100+ paying customers, and of the Figma design system behind it (45 components, 849 variants, Light and Dark modes), built to WCAG 2.2 AA/AAA. Two-time company award winner for ownership and design impact.

SKILLS

Product Design: Product Design, End-to-End Product Design, Product Thinking, B2B SaaS, Enterprise SaaS, Complex Workflows, Information Architecture, Interaction Design, User Flows, Wireframing, Prototyping, Usability, Dashboard Design, Responsive Web and Mobile Design (iOS, Android)

User Research: User Research, Competitive Analysis, Heuristic Evaluation, Requirements Gathering, Research Synthesis, Iterative Design

Design Systems: Design Systems, Figma Design Systems, Component Libraries, Component Architecture, Reusable Components, Interaction Patterns, Design Foundations, Design Tokens, Light/Dark Theming, Accessibility Annotations, Developer Handoff, Design QA

Accessibility: WCAG 2.2 AA/AAA, Accessibility-First Design, Inclusive Design, Accessibility Auditing, Accessible Interaction Patterns, Shift-Left Accessibility

Collaboration: Cross-Functional Collaboration, Engineering Collaboration, Stakeholder Management, Requirement Workshops, Design Reviews, Technical Feasibility

Tools: Figma (Components, Variables, Dev Mode), Adobe XD, Adobe Illustrator, Adobe Photoshop, Adobe After Effects, Adobe Premiere Pro, HTML, CSS

PROFESSIONAL EXPERIENCE

UI/UX & Product Designer

BarrierBreak | Mumbai, India | Jan 2024 – Present

- Sole product designer, end to end, for BarrierBreak's accessibility SaaS suite (A11yNow platform, A11yInspect for browser, Android and iOS, and a Figma plugin), working with the CEO as product owner and an engineering team that grew from 3 to 20 developers; A11yNow now serves 100+ paying customers.
- Architected a scalable, accessibility-first Figma design system built from the ground up with shared foundations, reusable components and interaction patterns across three products and 300+ screens, reducing design-to-development handoff effort by an estimated 35–40%.
- Embedded accessibility into reusable components and interaction patterns: focus, error and disabled states built as variants, plus a 13-part annotation kit that carries roles, labels and focus order into handoff, so accessibility is addressed systematically rather than as one-off remediation.
- Replaced spreadsheet-based accessibility testing with structured SaaS workflows and purpose-built report views, cutting page issue documentation from ~3 hours to ~30 seconds and data-entry errors by an estimated ~90%.
- Partner with Product and Engineering to turn ambiguous requirements into technically feasible workflows, resolve edge cases and trade-offs, and name component properties to match code props so developers map designs straight to code.
- Lead implementation reviews and design QA, including audits of the design system itself, and present design rationale to cross-functional stakeholders.
- Awarded Maverick Performer of the Year (2024) for ownership, execution quality and consistent delivery.

UI/UX Designer

CLXNS Technologies Pvt. Ltd. | Mumbai, India | Apr 2023 – Jan 2024

- Designed and shipped a high-traffic digital media platform, combining product UX, responsive UI and interaction and motion design to improve session engagement and user dwell time.

- Led UX/UI design of a multi-user mobile application for iOS and Android, from market and competitor research through information architecture, user flows, prototypes, visual design and launch.
- Redesigned onboarding and feature-discovery experiences to make complex product functionality easier for new users to understand and navigate.
- Collaborated with engineers and third-party API vendors during implementation, closing design-to-build gaps and reducing unnecessary development iterations.
- Created App Store launch and user acquisition assets supporting product growth while keeping consistency with the core product experience.

UI/UX Designer
Sankey Solutions | *Mumbai, India (Remote)* | *Aug 2021 – Aug 2022*

- Delivered B2B and B2C digital product experiences for automotive, banking, finance and e-commerce clients, maintaining a 99% client satisfaction rate.
- Designed data-heavy enterprise dashboards that turned large volumes of information and operational workflows into clear, decision-ready interfaces.
- Designed responsive web applications and cross-platform mobile apps for international clients from early concept through production handoff.
- Worked directly with clients, developers and stakeholders to gather requirements, present solutions, incorporate feedback and maintain design quality through delivery.
- Extended product experiences with motion design, visual communication and brand assets for multi-channel campaigns.
- Awarded Rising Star of the Year (2022) for high-quality delivery and ownership in first year.

SELECTED PRODUCT WORK

A11yNow | Enterprise Accessibility Platform, B2B SaaS, Complex Workflows

- Turned two 30-column testing spreadsheets into a structured SaaS workflow with four purpose-built report views and a data table behind every chart; the internal tool's patterns became the client product, A11yNow.

A11yInspect Browser Extension | Accessibility Testing Tool, Workflow Design

- Designed a DevTools extension for Chrome, Edge and Firefox that tests logged-in pages and states the crawler cannot reach in ~3 seconds and sends issues to A11yNow in one click; 1,000+ users and 200K+ issues exported.

A11yInspect for Android **and** A11yInspect for iOS | Mobile Accessibility Testing

- Designed mobile apps that scan live app screens on the device through a floating inspect button and flag issues directly on the affected elements, using the same issue types and severity levels as the web tools so results stay consistent across platforms.

Figma Accessibility Tool | Shift-Left Accessibility, Designer Workflow

- Designed a Figma plugin that audits frames against 15 WCAG 2.2 checks, fixes most issues in one click using the file's own colour styles, and hands specs to developers as Dev Mode annotations; an estimated ~70% of issues are now caught before engineering handoff.

Accessibility-First Design System | Design Systems, Accessibility, Enterprise SaaS

- Built a system of foundations, components and interaction patterns where large components are composed from small ones with swappable slots, so a fix in Button or Input reaches every Select, menu and navbar; Light and Dark come from one mirrored palette of 65 colour tokens.

EDUCATION

Bachelor of Engineering (B.E.), Information Technology
Sir Visvesvaraya Institute of Technology, Nashik, India | 2017 – 2020

Diploma, Mechanical Engineering
Amrutvahini Polytechnic, Sangamner, India | 2013 – 2017

CERTIFICATIONS AND AWARDS

- UI/UX Design Bootcamp Certification, DesignBoat UI/UX School, 2021
- Maverick Performer of the Year, BarrierBreak, 2024
- Rising Star of the Year, Sankey Solutions, 2022
